BJ Jumper bar

Use the BJ jumper bar to connect consecutive and nonconsecutive terminal blocks with the same spacing. Two types of jumper bars are available : an assembled unit and a nonassembled unit. Both jumper bars include a metal tube which makes contact with the terminal block's internal connector bar.
To mount the BJ jumper bar accessory onto terminal blocks still having top center partitions, the user must cut out all partitions between the blocks.
When the BJ jumper bar is used with each of two series of connected blocks, the top center opening at the junction of the two series must be closed by a circuit separator or a separator end section SCM, SCF or SCD to permit different voltage potentials on each series jumper bar accessory.

BJM Assembled jumper bar

Two versions of this accessory are available.

Fractionable model, composed of captive screws on a jumper bar system. This accessory can be used for connecting consecutive blocks only.

without IP20 protection (standard)

BJ Jumper bar (cont.)

BJS Jumper bar not assembled

Subassembly screw + post

Perforated jumper bar to be cut to length

To connect terminal blocks, place the metal tube into the top center hole on each terminal block to be connected. The metal tube contacts the terminal block's internal connector bar. The perforated bar is cut to length and placed flat along the center opening of the series of terminal blocks. The screw is inserted into the perforated bar's hole which is located directly above the blocks being connected. The screw goes through the threaded metal tube and is screwed into the terminal block's internal connector bar. This completes the electrical connection to the perforated bar and connects the block.

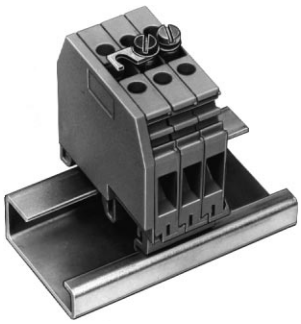
BJ Jumper bar (cont.)

BJP Pivoting jumper bar



This accessory is for connecting or disconnecting two consecutive blocks, open or closed. The use of a third non-connected block is recommended to allow for a "rest" position of the rotating jumper link. We recommend the use of a circuit separator **SC** in order to preserve the insulation. The **BJP** is mounted in the center of the terminal blocks, the connector bars of which are tapped for receiving the interconnection accessories.

	Current capacity	
For blocks with 6 mm *.238"* spacing		
BJP6	35 A	**0174 413.14**
For double deck blocks with 6 mm *.238"* spacing

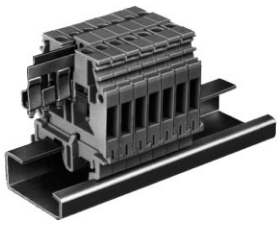
BJP82	50 A	**0163 169.04**
For blocks DR 4/6 with 6 mm *.238"* spacing		
BJPD6	35 A	**0173 223.24**

Max. recommended torque : 0.6 Nm

BJA Jumper bar for alternated jumping



This accessory permits the interconnection of consecutive or nonconsecutive blocks. For this, detach the studs manually where connection is not required. The use of two bars permits alternated jumping. A captive screw is mounted on each stud. This jumper bar is delivered with a protective cover snapped onto the top of the block, assuring touch proof protection.

Jumper bar assembly (protective cover included) :

For blocks with 5 mm *.200"* spacing

BJA5	24 A	10 poles	**0205 021.26**

For blocks with 6 mm *.238"* spacing

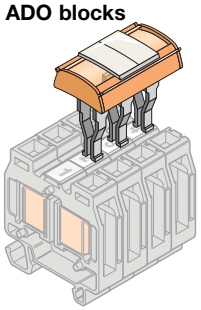
BJA6	35 A	10 poles	**0116 541.12**
BJA6	35 A	30 poles	**0116 589.13**

Protective cover, 10 poles :

For **BJA5**	grey	**0119 847.20**
For **BJA6**	grey	**0116 508.22**
	white	**0103 819.25**

Note : At each extremity of the jumpers, the assembly must be insulated.
For this, use either a closed block or a circuit separator **SC**.

BJADO Screwless jumper bar for mini ADO and ADO blocks spacing 5 or 6 mm only



This accessory permits the interconnection of consecutive or nonconsecutive blocks. For this, detach the studs manually where connection is not required.
Due to this flexible connection system, the contact is made by a simple insertion into the ADO jaw. 2 wire connection is permitted. Protection : NEMA 1
Marking with RCT 610 and RCT 810 markers (marking mode 21).
* Important : It is necessary to remove the jumper bar to access the wiring.

For ADO blocks spacing 5 mm *.200"*

BJADO5.2	2 poles	**0205 955.03**
BJADO5.3	3 poles	**0205 956.04**
BJADO5.4	4 poles	**0205 957.05**

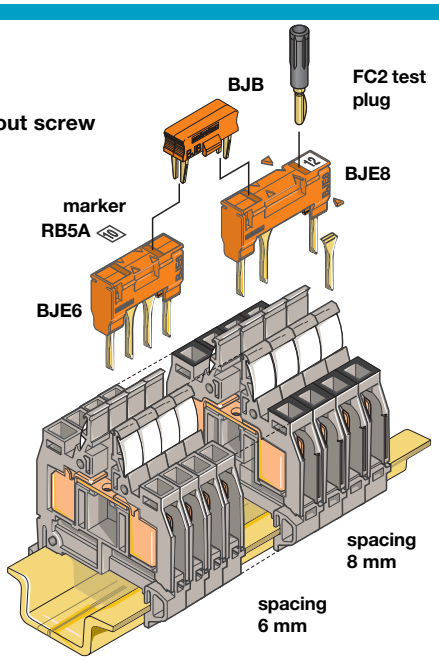
BJADO6.10	10 poles	**0205 982.27**
BJADO6.20	20 poles	**0205 992.21**

Current capacity : 17,5 A

BJE Jumper bar without screw

✓ **for compression clamp and ADO blocks**

This accessory permits the interconnection of consecutive or nonconsecutive blocks. For this, detach the studs manually where connection is not required.
Due to its flexible connection system, the contact is made by a simple insertion into the central hole of the current bar.
Easy indication of the non-connected blocks : simply cut out the notches placed on top of the plastic body of the jumper bar (orange color).
Marking with adhesive markers RB5A (marking mode 21). Compatible with test plug FC2.



For the mounting of these accessories on blocks with partitions, cut out the partition between two interconnected blocks.

BJE6

For blocks spacing 6 mm *.238"*

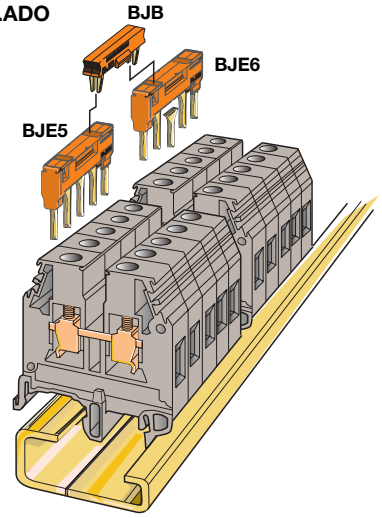
Marking with adhesive markers

* Cut out the partition for mounting of this accessory



BJB

This accessory permits connecting several BJE 5, BJE6, or BJE8 beyond 10 poles and to connect 1 BJE6 with 1 BJE8 (different spacings).

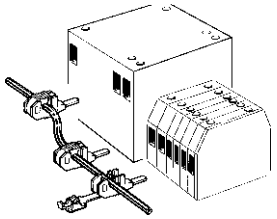
BJB	**0199 466.23**

AD

IDC jumper (insulation displacement jumper)

AD 2,5

Quick-jump lets you interconnect screw clamp terminals of different sizes, levels, and all manufacturers quickly and safely. Its insulation displacement technology makes it easy to use, fast, economical and does not require a special tool. Use as a jumper between relays, switches, and other electronic components. Entrelec Quick-jump will fit any screw clamp type terminal block, from 6 mm .238" spacing and larger.



AD 2,5

0114 205.20

Characteristics

Wire size

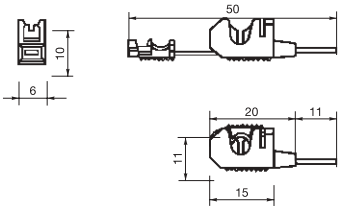
	IEC NFC DIN	UL	CSA
Solid wire	2,5 mm²		14 AWG
Stranded wire	2,5 mm²		14 AWG

Voltage			
Rated	600 V		600 V
Pulse			
Pollution degree			

Current			
Rated	26 A		15 A

Wire size			
Rated / Gauge	2,5 mm²		14 AWG

		Working temperature	Protection
		-55°C to +110°C	IP 20
		-55°C to +110°C	NEMA 1



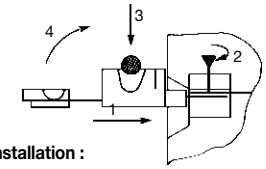
How to use : connecting Quick-jump to your terminal

1 - Insert Entrelec Quick-jump into your terminal screw clamp.

2 - Tighten the terminal screw.

3 - Guide jumper wire through the V-shaped opening in the Quick-jump.

4 - Secure the wire by closing the Quick-jump lever with any flat nose pliers.



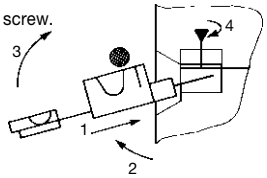
Adding a shunt in an installation :

1 - Insert Entrelec Quick-jump into your terminal screw clamp.

2 - Guide the terminal screw clamp into contact with the wire.

3 - Secure the wire by closing the Quick-jump lever with any flat nose pliers.

4 - Tighten the terminal screw.



PC

Comb-type jumper bar

PC **EIP**

This accessory can be used only on terminal blocks with at least one compression clamp connection. It permits the electrical connection of 2 to 10 blocks.
Interconnection of nonconsecutive blocks is possible by removing the teeth opposite the blocks which must not be connected. The comb-type jumper bars can be cut using pliers (or a saw) : in this case, the use of an insulating tip **EIP** is recommended where possible ; otherwise, use an **SCF** separator or **FE** end section between two series of interconnected blocks in order to preserve insulation. The comb is placed in the compression clamp before tightening the screws, above the eventual conductor.

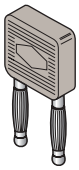
BP8.A4

Bridging plug

This accessory permits electrical connection of 2 identical juxtaposed blocks. These blocks have 8 mm / .315" spacing, are equipped with a test socket dia 4 / .16".



BP8.A4	
0173 888.20	

BNSTP...

Short-circuiting plug

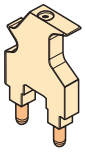
Shunt equipped with 2 plugs dia. 4 mm / .16" for ES16 and M6/8.STP blocks.
Rated voltage : 600 V
Rated current : 20 A
2 versions available :

✓ with test socket dia. 4 mm / .16" :
Light ivory

BNSTP1	0196 792.17

Grey

BNSTP1	0196 793.10

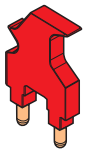


✓ without test socket:
Red

BNSTP2	0196 789.24

Grey

BNSTP2	0196 790.21



CB

Shield connector

Delivered separately, this bar of treated brass is mounted in the lower part of the terminal block. It ensures the continuity of the shield connection. The connection to the shield connector can be made either by soldering or by 2,8 x 0,5 mm or 2,8 x 0,8 mm quick connect tabs.
Notch available for bridging all shieldings.
This accessory overlaps on each side of the block by about 13,5 mm.
Use of this bar reduces insulation between terminal and ground, working voltage must be derated (consult us if necessary).

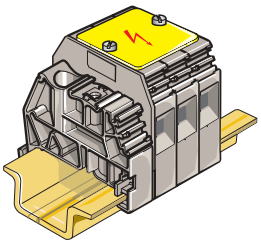
EP

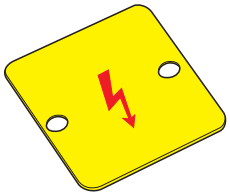
Protection label

Indicates live circuits, prohibiting access to the connection screws.
This accessory also protects the connections from dust and from touch.

EP...

Covers 3 or 4 blocks.
The color of the label is yellow with a red arrow. It can be fixed using 2 nylon screws (VSP ...) to be ordered separately.





Type of blocks	Number of blocks	Type	Part number
M 4/6	4	EP6	0163 427.17
M 6/8	3	EP6	0163 427.17
	4	EP8	0163 428.20
